Retail Benefits of Automatic Data Capture Technologies

Retailers have long benefited from data capture technology to maximize their efficiency throughout their supply chain and to help ensure the best customer experience. Barcode, RFID and IoT have revolutionized the retail supply chain.

- Enhanced consumer experience
- Maximized supply chain efficiency
- Improved inventory accuracy
- Eliminates reading & recording data errors
- Saves valuable labor time
- Reduces out-of-stocks

“The evolution of retail in the digital age hinges on AIDC technology as it facilitates the implementation of new strategies such as omnichannel retail, personalized experience, frictionless shopping and more.”

Datalogic
Retail Success with AIDC
Unique product identification applications help retailers achieve profitable results and surpass consumer expectations before, during, and after their purchase.

SIMON LOOS*
