Description

Tenders Are Invited For Barcoded and unbarcoded 384-well and 1536-well microplates

Description: this is a sources sought notice. this is not a solicitation for proposals, proposal abstracts, or quotations. the purpose of this notice is to obtain information regarding the availability and capability of all qualified sources to perform a potential requirement. this notice is issued to help determine the availability of qualified companies technically capable of meeting the government requirement, to determine the method of acquisition, and availability of domestic sources manufactured in the united states in sufficient and reasonably available commercial quantities and of a satisfactory quality. it is not to be construed as a commitment by the government to issue a solicitation or ultimately award a contract. responses will not be considered as proposals or quotes. no award will be made as a result of this notice. the government will not be responsible for any costs incurred by the respondents to this notice. this notice is strictly for research and information purposes only. small businesses are encouraged to respond. for equipment/supply requirements, responses must include the place of manufacturing (i.e., address if supply/equipment is a domestic end product and include country of manufacture). for equipment/supply requirements, small businesses must also address the size status of the manufacturer under the applicable naics code (i.e., address non-manufacturer rule).

background: the national center for advancing translational sciences (ncats) is a part of the national institutes of health (nih), which mission it is to catalyze the generation of innovative methods and technologies that will enhance the development, testing and implementation of diagnostics and therapeutics across a wide range of human diseases and conditions. the antiviral program for pandemics (app) aims to develop safe and effective antivirals to combat sars-cov-2. app will accelerate the development of a portfolio of promising antivirals that can quickly pivot to combat future pandemics. having safe and effective oral antiviral candidates ready for deployment in later-stage clinical trials against a newly emergent virus would save lives, reduce serious illness, and prevent overwhelming surges in hospitalizations during a viral outbreak or pandemic. the app and other biology groups as needed are in full swing ramping up into their screening season on the robotic systems and as a result will need of various 384-well and 1536-well microplates in order to perform their scheduled assay screens, combination matrix studies for a vast quantity of projects. the particular plates are available through greiner-bio who has provided us with a customized quote specifically for ncats. purpose and objectives: the purpose of this notice is to identify potential sources for the acquisition of barcoded and unbarcoded 384-well and 1536-well microplates for app and...

Description
Tenders Are Invited For Global Satellite and Terrestrial Automatic Identification System (AIS) Data

Combined synopsis/solicitation template

this is a combined synopsis/solicitation for commercial items prepared in accordance with the format in federal acquisition regulation (far) subpart 12.6, as supplemented with additional information included in this notice. this announcement constitutes the only solicitation; quotes are being requested and a separate written solicitation will not be issued. this enclosure is an addendum to far provision 52.212-1, instructions to offerors- commercial items, which applies to this acquisition.

competitive quotes are being requested under request for quote (rfq) number n66001-22-q-6335. the north american industry classification system (naics) code applicable to this acquisition is 517410 satellite telecommunications. this is a competitive solicitation using full and open competition to fulfill the requirement.

description of requirements

the government is requesting quotations for 455 global satellite and terrestrial automatic identification system (ais) data license subscriptions. the required ais license subscriptions must provide worldwide critical navigational data coverage to end users in near real-time in national marine electronics association (nmea 0183) format and displayed through the web-based seavision regional maritime picture (rmp). see attachment 1 for minimum specifications.

clin structure: for anticipated contract line item number (clin) structure, see attachment (02)
clin structure.

anticipated license terms:

term start date end date

base 13 august 2022 12 august 2023

option 113 august 2023 12 august 2024

option 213 august 2024 12 august 2025

option 313 august 2025 12 august 2026

option 413 august 2026 12 august 2027

method of delivery:

license subscriptions are expected to be delivered through electronic means. (email addresses will be provided upon award)

offeror instructions

the government intends to award a firm-fixed price (ffp) purchase order resulting from this solicitation to the responsible quoter whose quotation, conforming to the solicitation, is most advantageous to the government, as defined in the evaluation factors for award section below. a complete quote must be received for consideration. respond to each item listed below, if the response is none or not applicable, explicitly state and explain. the government may consider quotes that fail to address or follow all instructions to be non-responsive and ineligible for award. a complete quote includes a response and submission to each of the following:

1. general information: quoter business name, address, cage and ueid codes (ensure representation and certifications are up to date in sam.gov <<http://sam.gov>>), business size...
